

**ALEUT AEROSPACE ENGINEERING TO SUPPORT
THE U.S. AIR FORCE ADVANCED SPACE OPERATIONS SCHOOL
AT PETERSON AIR FORCE BASE**

FOR IMMEDIATE RELEASE

COLORADO SPRINGS, CO (January 26, 2017) – Aleut Aerospace Engineering, LLC (AAE) was recently awarded the \$19.9 Million Advanced Space Operations School (ASOpS) Instructor, Information Technology and Security Services contract, located at Peterson Air Force Base, CO. The contract’s five-year period of performance starts on February 1, 2017.

AAE will provide highly specialized instructors, information technology professionals, and security services to support ASOpS. The ASOpS mission is to provide responsive training in support of tactical, operational, and strategic joint and coalition space operations. Annually, ASOpS educates more than 1600 students from all branches of the United States military, other Government departments, and select allied nations.

Sam Cole, President of Aleut Management Services said, “AAE is honored to have been selected to help ASOpS educate our nation’s Joint Space Forces. We look forward to continued partnership with Air Force Space Command and ASOpS.”

Aleut Aerospace Engineering, LLC is an SBA 8(a) company, and subsidiary of The Aleut Corporation, an Alaska Native Corporation. The Aleut family of companies offers extensive product and service capabilities including operations, maintenance and related services, information technology and communication services, engineering services, mechanical contracting and construction, water testing, and oil field services to a range of customers and government agencies.
